

# Mark's Mat Templates 2008

©2008 Mark O'Connell

A Collection of over 25 Multi-Image Double Mats in Layered PSD format.  
Our Most Popular Styles that sell at our studio every day

## Mark's Mat Templates

**W**e originally designed these for use in our studio to replace the traditional cut paper mats we offer. We have designed the sizes to match the mat/frame combos offered by leading frame suppliers. With these virtual mats and our customized actions, we can create a mat to match exactly the subjects clothing, background, whatever we want, in a matter of minutes. Then we just flatten, save and ftp the file to our lab. Our lab, [www.lustrecolor.com](http://www.lustrecolor.com) has integrated these sizes into their Roes software, to make our ordering "hassle free" I'm sure your lab can do the same for you. Now you can sell multi-image mats easily.
